# STANDARD PACKAGE

This package will give you intimate details about your deer herd, including your target deer. You'll be provided with photographs of all your bucks, so you can understand the age demographic of your herd.

You'll receive a comprehensive PDF including all the variables you hunt by: wind conditions, temperature, thermal activity, pressure change, and moon phase. Know where he's at during your favorite conditions.

# INTERACTIVE MAPPING INTEGRATION

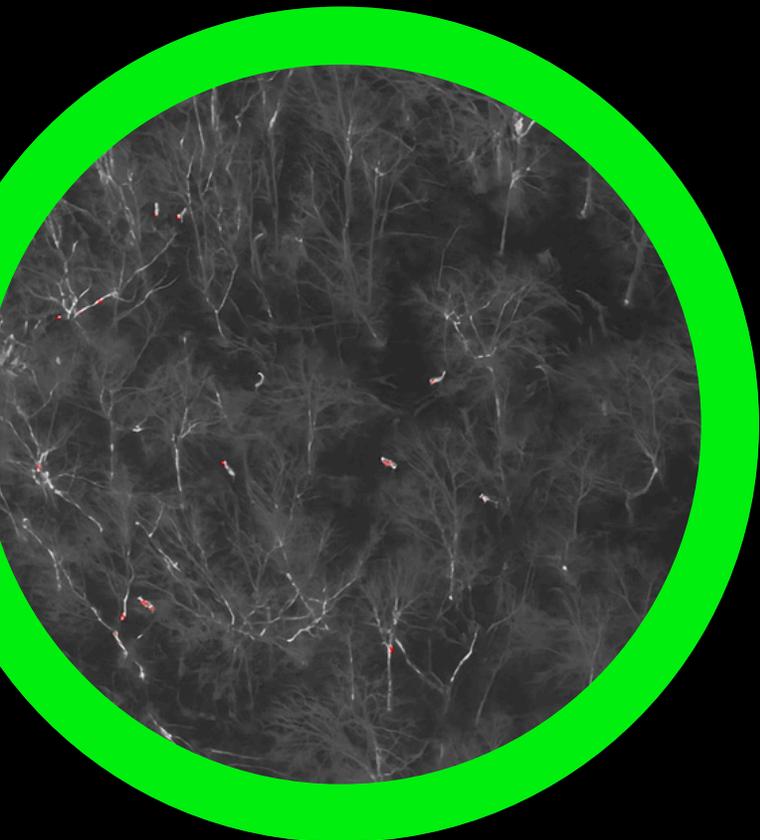

You'll get a detailed KML file containing all survey data, seamlessly compatible with both OnX and Google Earth platforms. This allows you to view the exact locations where deer were observed during the survey.

# BUCK PHOTOGRAPHY

Using advanced drone technology, we capture high-quality images of bucks present on your property during the survey. These photographs are securely stored and accessible through OnX or Google Maps.

# Basic Package

## BUCK TO DOE RATIO

Take the guess work out of managing your herd. With this key information, you'll be able to make informed decisions for food, cover, and timber cuts to move does off your property and bring bucks in.

You'll received a PDF containing the sex demographics, in addition to the basics.

# Minimalist

**THE YEAR ROUND PACKAGE.** Whether the bucks are holding antlers or not, you'll get an accurate deer density so you know how much food, cover, and water your herd needs based on your management goals.

Great for add-ons like fawn, turkey, and predator survey. You will still get pins on all marked deer sent directly to your apps!

# OFFICIAL CENSUS CERTIFICATE

Upon completion of the survey, you'll receive a professional certificate documenting your property's deer population statistics and buck-to-doe ratio at the time of the survey.

You'll also received a PDF document with a detailed breakdown of your deer activity.
